WHAT'S NEW FROM ANNE ROWENA

Anne Rowena, famous for her beautiful knitting kits, has introduced five new stunning

designs to her range. They include tartan, trellis and floral patterns that are suitable for hand knitters and owners of Bond and Chunky machines.

The designs are

available in luxurious mohair and velvety chenille. For further details and order form contact Anne Rowena, 4 Trinity Street, Cambridge CB2 1SU. Tel: 0223 66841.

FASHION FOCUS
British Hosiery Week revealed trends to match and complement the fashion and knitwear we will be wearing this coming summer. Leggings will be an essential with long tunic jumpers, and tartans, checks and florals match the Intarsia designs of the knits. The heavy opaque tights of winter are giving way to lightweight semi opaques in fresh light colours — and to show the colours we will be wearing we illustrate the colour chart from the hosiery firm — Hue.

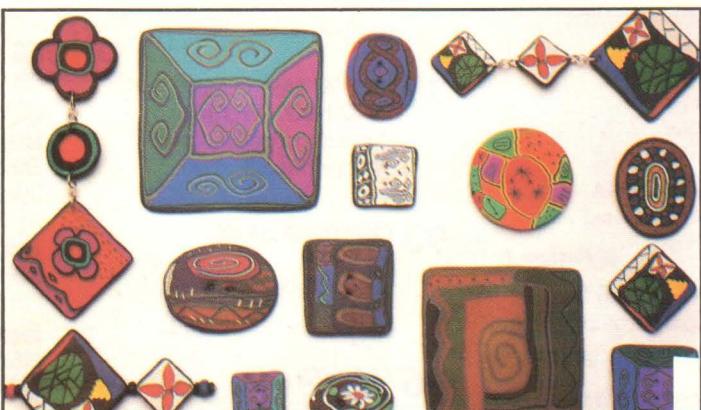

THE TUNIC LOOK ▷

The long, lean tunic look will continue into Spring and Summer 1993. Emreco have a comprehensive selection typified by this cotton version with abstract and floral patternings detailed with Angora — and this mix of patterning is yet another trend for the New Year.

Available in a White background with a choice of Candy Pink, Sky Blue or Navy contrasts.

In sizes 34-40in, this sweater will be available in specialist shops from February 1993 and will cost approximately £58.00.

*Designs along this theme will be found in *Designer Clothes Vol 2*, No 1 on sale 11th March.

GOING GREEN

Back in the April issue we gave you news of a recycled yarn available on cones. This month we are pleased to offer a yarn and yarn and fabric kit to make a jacket, skirt and shawl. The yarn and fabric from Evergreen Recycled Fashions is offered at a special low price exclusive to readers of *MKN*. The design and order form can be found on pages 78-81.

UPDATE

Update on the Lifescan Appeal (December issue) — unfortunately Rangers were unable to commit themselves due to other charity events and therefore Leeds Rugby League Football Club have taken it on board at Headingley, Leeds. Saturday 1st November saw the official launch with the first 17 feet being

displayed on the pitch. Completion date is 18th April when the scarf will measure 430 yards (hopefully) around the perimeter of the pitch. At time of going to press Lyn had knitted 70 feet!

CLASSES

Direct Knitting & Sewing Supplies are pleased to announce that their

popular open learning scheme now has two new courses for the Pfaff/Passap 6000E. The first course consists of five easy to follow lessons (that are written in plain English!) and takes you through basic knitting techniques. The second course is more advanced. For further details contact Direct

Knitting & Sewing Supplies Ltd, 769/771 Attercliffe Road, Sheffield. Tel: 0742 449888.

North Kent Adult Education are holding a Knitwear Day on Sunday 14th March 1993 at the Medway Adult Education Centre, Eastgate, Rochester, Kent ME1 1EW. Included are lectures, fashion shows, workshops and master classes. Lectures on

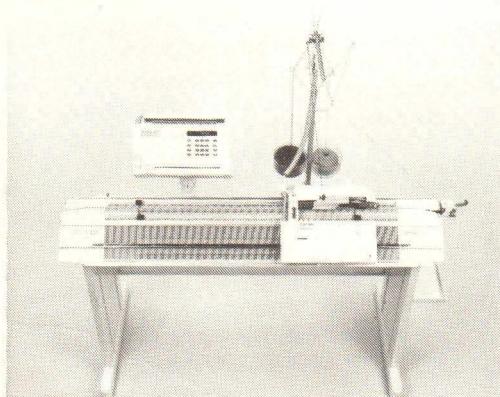

design, colour changer and machine accessories.

Tickets for entrance will be £4, the lectures £2 extra and £6 for the master classes. For further information telephone Rosemary Hills on 0634 387979, or Wendy Damon on 0634 221629 or Jo Cooper on 0634 362232 or by writing to Medway Adult Education Centre.

The Surrey Adult and Continuing Education Service is holding two Machine Knitting Workshops in the Guildford area. Both workshops will explore the use of different yarn and stitches, decorative ideas and how to give a professional look to a finished garment. The first is on 26th February 1993 at Sydenham Road, Guildford from 10.00am - 3.00 pm (1 hour for lunch). A crèche is available. The second course is at the Heathcote Centre, Ash on 21st March 1993 from 10.00am - 2.30pm (1/2hr for lunch). The cost is £8.40 per course and the tutor is Carolyn Goulter. For further details and enrolment please contact Guildford Area, Surrey Adult and Continuing Education Service, Sydenham Road, Guildford GU1 3RX. Tel: Guildford 60978.

FROM THE SHOW Dear Readers

The fifth London Knitting and Needlecraft Exhibition took place at Picketts Lock from 6th to the 8th November. For the first time this year the exhibition had been moved to later in the Autumn season which proved popular with the increased number of people attending. This venue not only attracts visitors from the south of the country but is also popular with the Welsh and East Anglians. As usual there was a full programme of events taking place with four fashion shows and two lectures daily. *Machine Knitting News* had its £100 cash draw each day. The winners were Friday, Mrs B Gibson of Basingstoke, Hants; Saturday, Elaine Barker of Longfield in Kent and on Sunday we had our first male winner Mr M S Robinson from Farnham in Surrey. Everyone is entitled to enter the draw, all you need to do is buy a show catalogue, fill in the form and drop it in to a box on the MKN stand. The winner is announced during the final fashion show and if that person has already left the exhibition they are informed by post immediately afterwards.

This was the last exhibition of 1992 and by the time this goes to print we will be well into the 1993 exhibition season and we look forward to seeing you at your nearest venue.

POCKETS

Different Jacquards was supposed to be this month's theme, but I hit a few snags so would like to show you how to knit my favourite pocket instead. Pockets on a cardigan are very useful, so why do we so rarely include them in a garment? It is easy to knit a pocket when the main knitting is in stocking stitch, but when it comes to Jacquard or tuck stitch it is a different story. To interrupt the pattern sequence, knit the pocket and then restart the pattern again at the correct row is not something I find easy to do. It is a very fiddly job and it is too easy to restart the pattern at the wrong row. Some time ago I found a foolproof way of knitting pockets without interrupting the pattern sequence. This method was originally worked out for the Passap machine, but is even more simple on a Singer. The secret is to make an opening for the pocket, knit two rows with waste yarn and continue knitting, there is no interruption of the pattern. AFTER the front of the cardigan has been finished, the band and the pocket are knitted. The sample pockets were knitted over 22 needles, normally I find 26 needles give a useful opening.

OPENING

Choose position for pocket and move 22 needles on back bed to position 2 (optional for Jacquard). Knit

Trudie shares her secret and shows how to knit her favourite pocket

one row. Hang these 22 stitches to opposite needles on front bed and knit through so that only one

strand of yarn is on front bed needles. With waste yarn, knit two rows by hand over these 22 front bed needles. Hang two small weights to pull these stitches down. Put the 22 empty needles on back bed to position 2 (optional for Jacquard). Continue in pattern, the back bed needles will cast on automatically. When finished, the knitting looks like **Sample 1**. If possible, steam to set the waste yarn stitches.

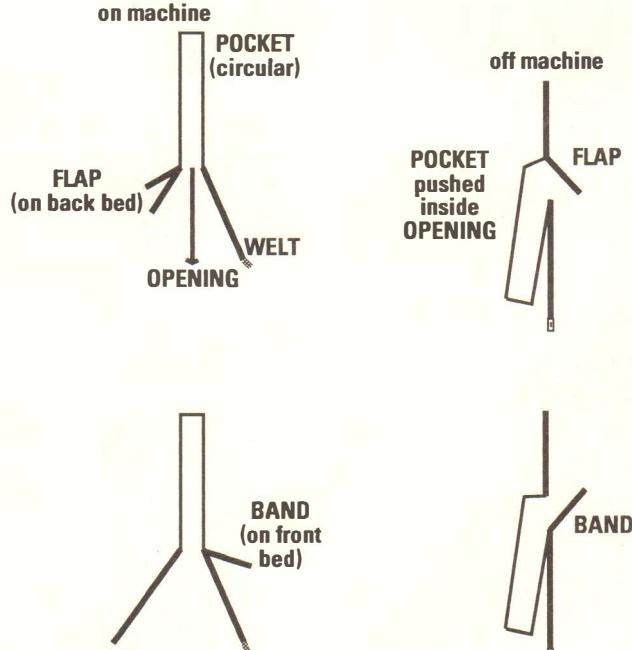

POCKET BAND

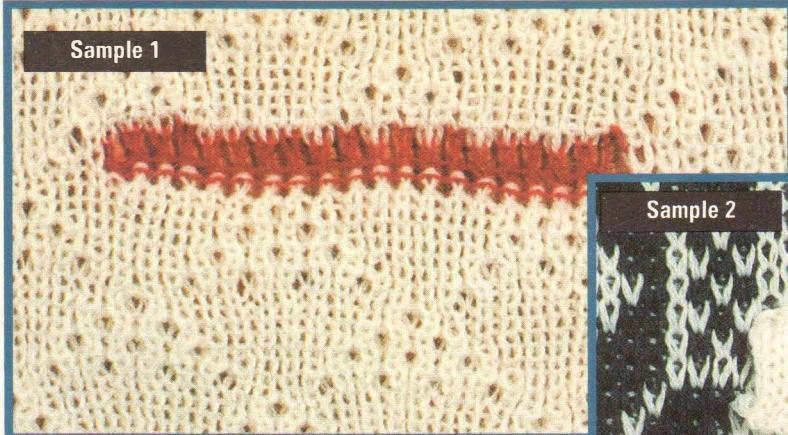

Cast on over 24 needles (two more than for opening) on both beds. Knit 8 to 10 rows. For the tuck stitch sample, I used V/V, for the flap on the Jacquard sample, I knitted 2 rows circular, 1 row V/V and 14 rows circular. Now comes the important part: for a flap hang the front bed stitches to the back bed (**Sample 2**) and for an upright band hang the back bed stitches to the front bed (**Sample 3**). Knit 1 row single bed with a large stitch size to give a nice purl edge. Do not remove the weights.

POCKETS

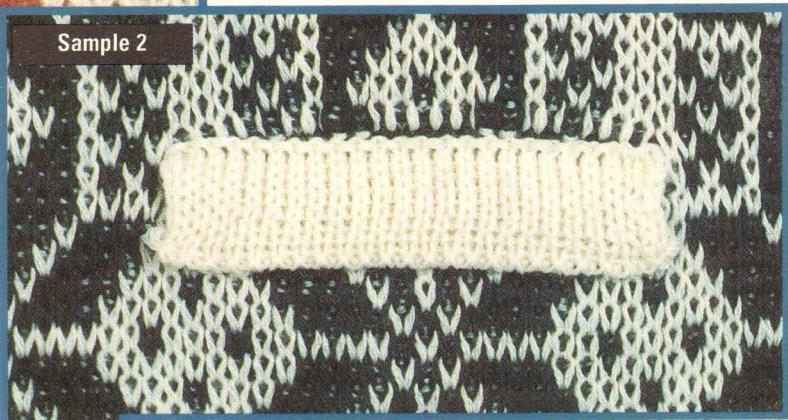

On bed opposite band put 24 needles to working position. Open bedspace very wide. Take the cardigan front and fold it where the waste yarn is. Push it between beds. Hang stitches BEFORE waste yarn on front bed needles, starting with the second needle. Close bedspace slightly and hang loops

DIAGRAM 1

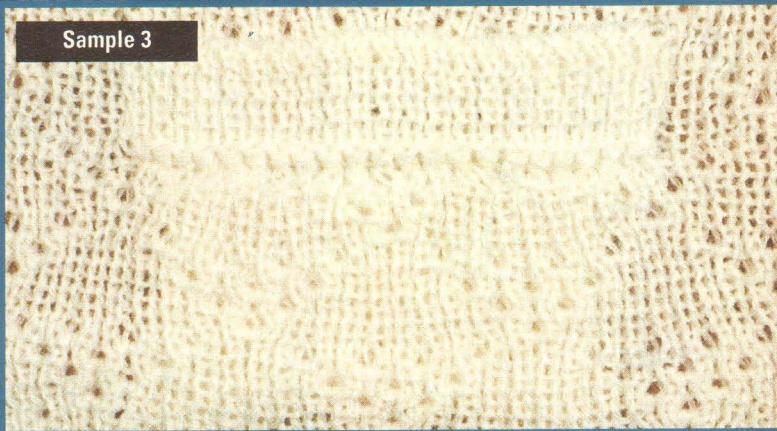

Sample 2

Sample 3

AFTER waste yarn on back bed needles, starting with the second needle. Cut and remove waste yarn. On each side of opening pick up two loops and hang them on the first and last needles on each bed. Set the carriages to circular knitting and with a generous stitch size knit two rows. If you want a wider pocket, increase by picking up loops and hanging them on first empty needles each side every two rows until pocket is wide enough. Knit until row counter reads about 60. Hang front bed stitches to back bed, knit one row T12 and cast off. All that remains to be done is to push the pocket into the opening and to sew the sides of the upright band on to the cardigan (Diagram 1). I like these loose pockets, they do not spoil the cardigan's outline. On the inside of the cardigan they look like Sample 4. For a simple pocket with an upright band, follow the above instructions until the band has been finished off with the purl row on the front bed. Hang the stitches before the waste yarn on the needles of the band, starting with the second needle. Knit one row with a large stitch

size and cast off. Now pick up the loops after the waste yarn and hang them on the back bed needles. Cut the waste yarn and remove it. Pick up two loops each side and hang them on the needles on each end. For my sample pocket you should now have 26 stitches on the back bed. Put one more needle to work at each end. Knit about 30 rows and cast off loosely. Sew into position.

This simple pocket is useful when the main garment has been knitted in a single bed pattern. With a double bed pattern this type of pocket can easily distort the shape of the garment unless care has been taken with the stitch size.

I hope you will knit a test pocket. It looks very confusing when it is on the machine, but I promise you, it works!

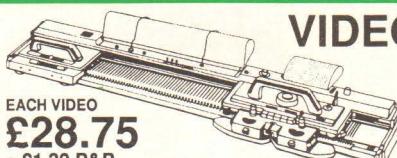

Next month we'll take one pattern card and see how many different stitch patterns it can produce. Until then,

Trudie

Welts are an inseparable part of
our everyday knitting, but
there are plenty of patterns that
can be added to make them that
little different from the 'usual'

VERTICAL STRIPES

There are some neat touches around on otherwise plain garments at the moment, featuring vertically striped welts. For mock ribs, we can copy the look quite easily as shown in Samples 1 and 2. Both welts were worked using Fair Isle. The narrow stripes were knitted over a 1x1 setting and the wider ones over a 2x1 needle arrangement. You probably have a suitable card for the 1x1 stripes amongst your basic patterns. Diagram 1a shows the punching required with the needle arrangement shown beneath. Because the

w Looks for Mock Rib Welts

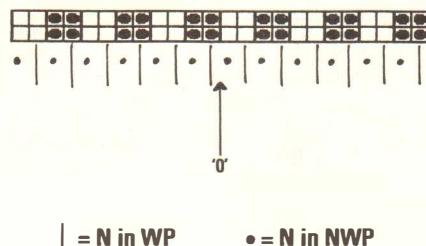

CAROL CHAMBERS

pattern has been punched 'double width' and we are only using alternate needles, it means wherever your centre needle in work is, the pattern will be correct! The only caution when working the Fair Isle is if you have a machine which automatically selects the end needle. This mechanism must be cancelled. If it isn't, then it will take every missing needle as the end of the row and select the next

When working with needles out of work, pulling the knitting lengthwise once it is removed from the machine is essential so that a line gap of thread isn't seen.

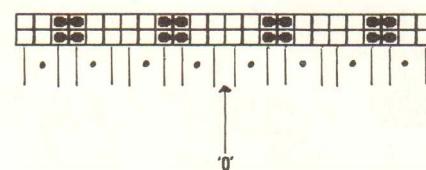

one. You will end up with a one colour 1x1 rib instead of a patterned one! For a 2x1 rib we need to look at the needle arrangement in relation to the punched card — as shown in Diagram 1b. In this instance, it is important that you have the correct needle arrangement in relation to the card, or the pattern may not come out exactly as shown. Once again, please remember to cancel any end needle selection for the same

DIAGRAM 1a

reason as given for the 1x1 arrangement.

PATTERNING TENSIONS

When working with needles out of work, pulling the knitting lengthwise once it is removed from the machine is essential so that a line gap of thread isn't seen. When working mock rib welts in Fair Isle, there can be quite a bit of give when the work is pulled as the 'slack' from the missing needle and from the floats behind is taken up by the stitch lengthwise. To keep a reasonable tension in such ribs, I usually use a whole number tighter than I might for plain ones. For instance, if my stocking stitch tension

is 6, I would use tension 3 for a plain 1x1 rib and tension 2 for a Fair Isle rib.

INTEREST IN PLAIN WELTS

It is quite easy and fashionable to add interest to a plain (coloured) welt and one of the easiest ways to do this in mock rib is by adding a cable design. Sample 3 shows a 3x1 rib (3 needles in work, 1 needle at 'rest' throughout) with cables. I chose the narrow ribbing to keep a ribbed look, but you could use a 4x1 — so you have two sets of two stitches to cable over. Alternatively, you could get carried away with your needle arrangement — a couple of ideas are shown

in Diagram 2b. Sample 3 was quite easy to work. Only alternate lines of three stitches were cabled. There is no need to do this on the underside of the hem — so if your total rows before you turn the hem are 30 (for instance) then the first 14 or 16 can be worked plain and the cabling started after this — unless you will be continuing in a stitch pattern where the purl side is the right side (such as tuck or slip). If you will be continuing with tuck as the main pattern, then work your cable over the first 14 or 16 rows and complete the rest of the rows in plain knitting. In other words, there is no need to put extra effort into that part of the hem which will not be seen! The cables in Sample 3 were worked every sixth row and the two outside stitches of one of the groups of three were crossed — the patterning and needle layout is shown in Diagram 2a.

'PROPER' FAIR ISLE DESIGNS

Working a more complex pattern than a simple stripe is quite straightforward. Patterns are easily found for 1x1 mock ribs — simply

New Looks for Mock Rib Welts

select a 12 stitch repeat and punch it double width (electronic owners, choose your pattern and use the double width button). Sample 4 shows a diamond pattern worked on a 1x1 rib hem. I have stopped the patterning a few rows short of the hem turn up, so you see the mock rib more easily, as the Fair Isle patterning doesn't look 'conventionally' ribbed at all! The stitch pattern used is shown in Diagram 3 — as you can see, it doesn't matter how the needles are arranged in relation to the

It might seem a bit strange for the continuity of pattern to be 'skipping' a needle position now and then, but it is quite easy to do.

card, provided they are in a 1x1 setting, the patterning will be correct. For a 2x1 rib arrangement you need to be a little more careful about the needle/punchcard relationship. Diagram 4 shows the punchcard for the zig-zag pattern in Sample 5

with the appropriate needle arrangement below it. As you can see, if you don't arrange the needles correctly the pattern will not be continuous across the row — as some of the needles which should be knitting the contrast yarn could be 'missing'.

DESIGNING YOUR OWN FAIR ISLE WELTS

For 1x1 ribs I think you will see it is simply a matter of taking any 12 stitch (for 24 stitch punchcard machines) repeat and punching it double width. For any other needle arrangement you are best planning it on paper first. Put dots on to graph paper to correspond with needles which you want in working position (2x1, 3x1 etc. as desired). Keeping these in view as a reference

point, mark out your Fair Isle pattern above. It might seem a bit strange for the continuity of pattern to be 'skipping' a needle position now and then, but it is quite easy to do. Just make sure you keep the original piece of paper so that you arrange the needles correctly for the finished pattern!

I know from comments received over the years that many single bed owners can feel a bit like the 'poor relation' when it comes to their welts and bands. I hope I have been able to show you that the possibilities for mock ribs can add a far greater garment interest than you had realised. Happy knitting,

A HINT FOR CREATION 6 OWNERS

Recently I knitted a children's jumper with two parrots on the front. It was in four colours. But the back and sleeves were knitted in two colours only. This gave a different texture and colour, because of the

'grinthrough'. I hit on the idea of knitting in the neck shapings, and after a proper steaming I could just cut on the line. The computer would not let me download a two colour pattern for a four colour tech. But by putting a single dot in each of the other two

colours on the last row inside the part that was to be cut out, I had a four colour tech but only two colours on show. The top print out is an enlarged section of the back neck with the two extra dots. I hope that it helps other knitters with this problem.

Love your magazine.

PROBLEM SOLVED

Being like all machine knitters, unable to resist a bargain, I had a number of odd cones to use up and was pleased to find a pattern which was just the thing for one of them. The yarn was very fine, and also space-dyed, so simply running two ends together would have spoiled the subtle colour differences which were the major part of its attraction. The solution was to employ the under-used technique of plating, two ends of the yarn just enough to achieve the required tension. Then when starting the

second sleeve it became obvious that I would not have sufficient yarn to finish the garment. No chance of course of getting any more — it had come in one of those bargain bumper bundles — so once again I used plating to solve the problem; instead of the underneath end being the same as the plating yarn for the two sleeves, collar and front band, I used plain white cotton. The garment looked as if it had been meant to be that way; if I see something with just the sleeves or trim in a contrast colour I'm afraid I always think the knitter ran out of yarn!

I had never used plating seriously before this, though when going through the manual when I first got the machine I had tried it out, so I too am guilty of neglecting the technique. Not any more though — I'm going to have a go with some of the other odd ends of fine yarn to see what I can make of them.

SURVEY

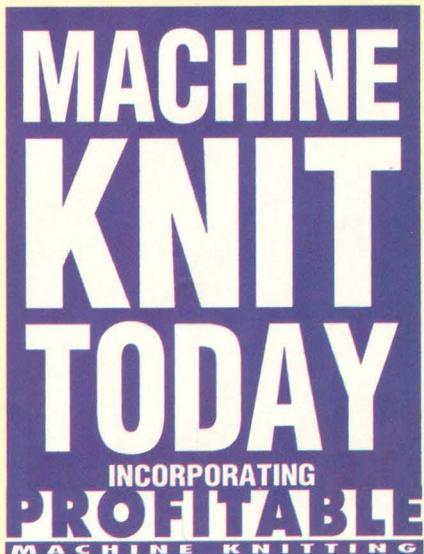

The recent survey published in *Profitable Machine Knitting* has confirmed what readers of PMK enjoyed and wanted to see included in their monthly magazine.

THE RESULT

An overwhelming request for in-depth technical articles and knitting techniques and a selection of quality patterns was the result.

Edited by Carol Chambers with Jackie Demuth as Fashion Co-ordinator and a team of Expert Contributors with in-depth knowledge of every machine and knitting technique, it will become THE magazine for all PMK readers and a valuable *extra* for all other machine knitters.

Letters

Dear Editor

I read with interest John Allen's feature in the December issue of *MKN*, when he mentioned making buttons and beads from Fimo.

I have been experimenting with this for a few months and at the moment my family are 'testing' buttons on various garments to see how they stand up to 'wash and wear'!

I am pleased to say everything is going well so far. John Allen mentioned a book *The New Clay*, would it be possible for you to send me the name of the author and publisher so that I can order it? It would be a great help to get some guidance and hopefully give me enough confidence to use my buttons on the garments I sell.

I have also made some successful beads so you

can see I am really hooked on Fimo.

Any chance of an article on button and bead making in the magazine? It's great fun to do.

Dear Editor

I've just bought a copy of *MKN* December, and note in Letter from America that the book *The New Clay* is mentioned. I'd like to point out that we import this book from the publishers (in small quantities) because my hand spinning

customers have even greater problems finding suitable buttons! It's a wonderful book, with fabulous photography BUT, I must point out that it's mainly 'arty', elaborate pieces and there's only a page and a half devoted to buttons.

It's also expensive, £22 to £24 depending on currency rates at time of invoicing. I would be pleased to supply your readers.

Dear Editor

I write to thank you for picking out my entry as the winner in the August issue *Many A Mickle Yarn Competition*.

It shows that persistence pays in the end as I have been entering your competitions for years without any previous success.

Therefore imagine my surprise to receive a phone call from David at *Many A Mickle* informing me of my win.

As *Many A Mickle* is only a few miles from my home I have been going there for yarn for a few years and have always found David and Gary and their staff very helpful and friendly and it will be a pleasure choosing my prize yarn there.

Task 1

Intarsia is one technique that I always find new knitters are keen to learn how to do. With so many lovely designs available it isn't surprising really that these garments are so popular. However, you may think that creating your own Intarsia design would be rather a daunting task (especially if you have the pictorial type in mind). It needn't be and this month I will try to dispel your fears and hopefully show you some 'fun' ways to develop ideas. I will focus on abstract designs and leave you to consider choices of yarns and colour schemes. Do not worry that the ideas will call for artistic ability that you feel you haven't got or for expensive art materials. Cut-out cardboard shapes are used for templates (or try patchwork templates you can buy in craft shops) and felt tips or crayons are all you need for experimenting with colours. What could be simpler!

Once you have found a design you are happy with, the next step is to consider where and how to use it on garment pieces. A simple garment style will involve the minimum of shaping allowing you to concentrate on the Intarsia knitting itself. Transferring your design on paper into a full scale pattern will involve using either stitch related graph paper or one of the design boards intended for just such techniques. To give you an idea of how the designs will look on a garment shape I have drawn a jumper on paper and then cut it out leaving a hole for the design to show through. I find this does work quite well as long as you remember the final scale of the design (small squares on paper may not turn out as you expected when enlarged to size in relation to the garment). The other interesting thing about these ways of developing ideas is that they can also be used to create

TURE this

Task 2

Fair Isle designs for punchcard or mylar sheets or even shapes to appliquéd. Remember, too, that Intarsia can also be combined with many of the other techniques I have looked at in Design Line over the months such as rouleau cords, quilting, embroidery etc. So look through your back copies of *MKN* to refresh your memory and

see if any ideas could enhance your Intarsia designs.

I hope you enjoy experimenting but don't get too carried away — remember you have to knit it!

TASK 1 (simple leaf or flower shape). Draw round a cardboard template and arrange the

This month Jill Murray shows some very interesting patterns and textures suitable for Intarsia knitting

More Intarsia designs can be found on pages 100 and 106, and don't forget the latest Collection featuring Intarsia on sale now

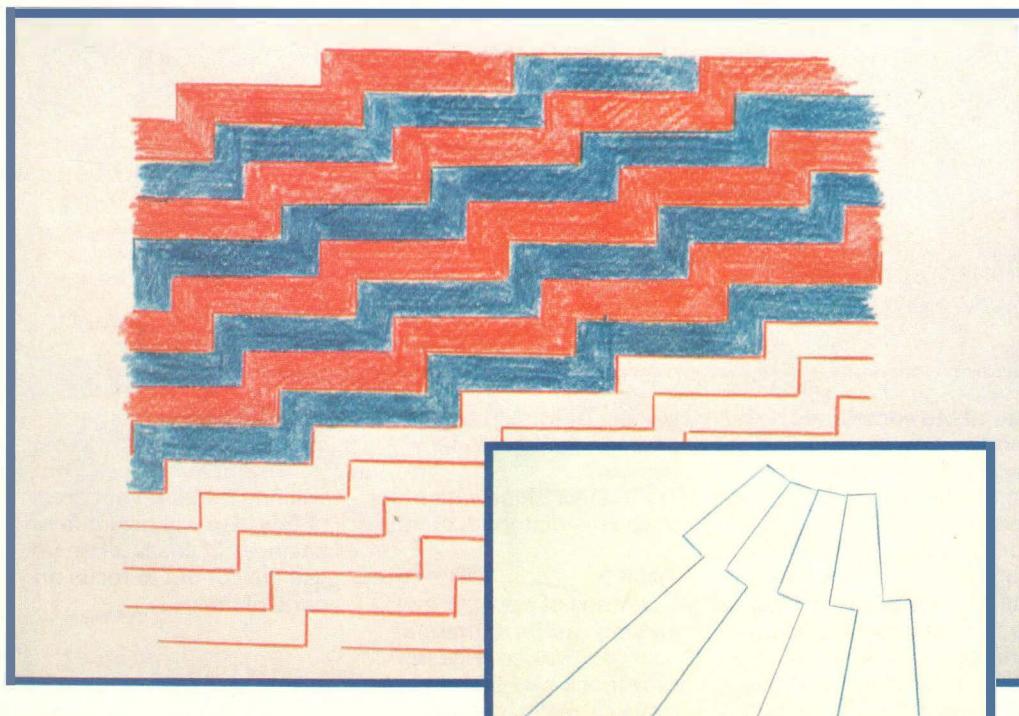

shapes as shown here in a regular pattern or try a more 'haphazard' arrangement. Play around with the jumper cut-out to find a position over the design that appeals to you.

TASK 2

The same design as Task 1 but with added freehand background lines to make the design 'busier'. The areas between the lines could be used to introduce more colours in vertical lines or a patchwork effect, should you be feeling even more adventurous. Adding a background can often liven up a simple design but usually works best when you keep to a theme, for example, squares/straight lines, curved shapes with curved lines.

TASK 3

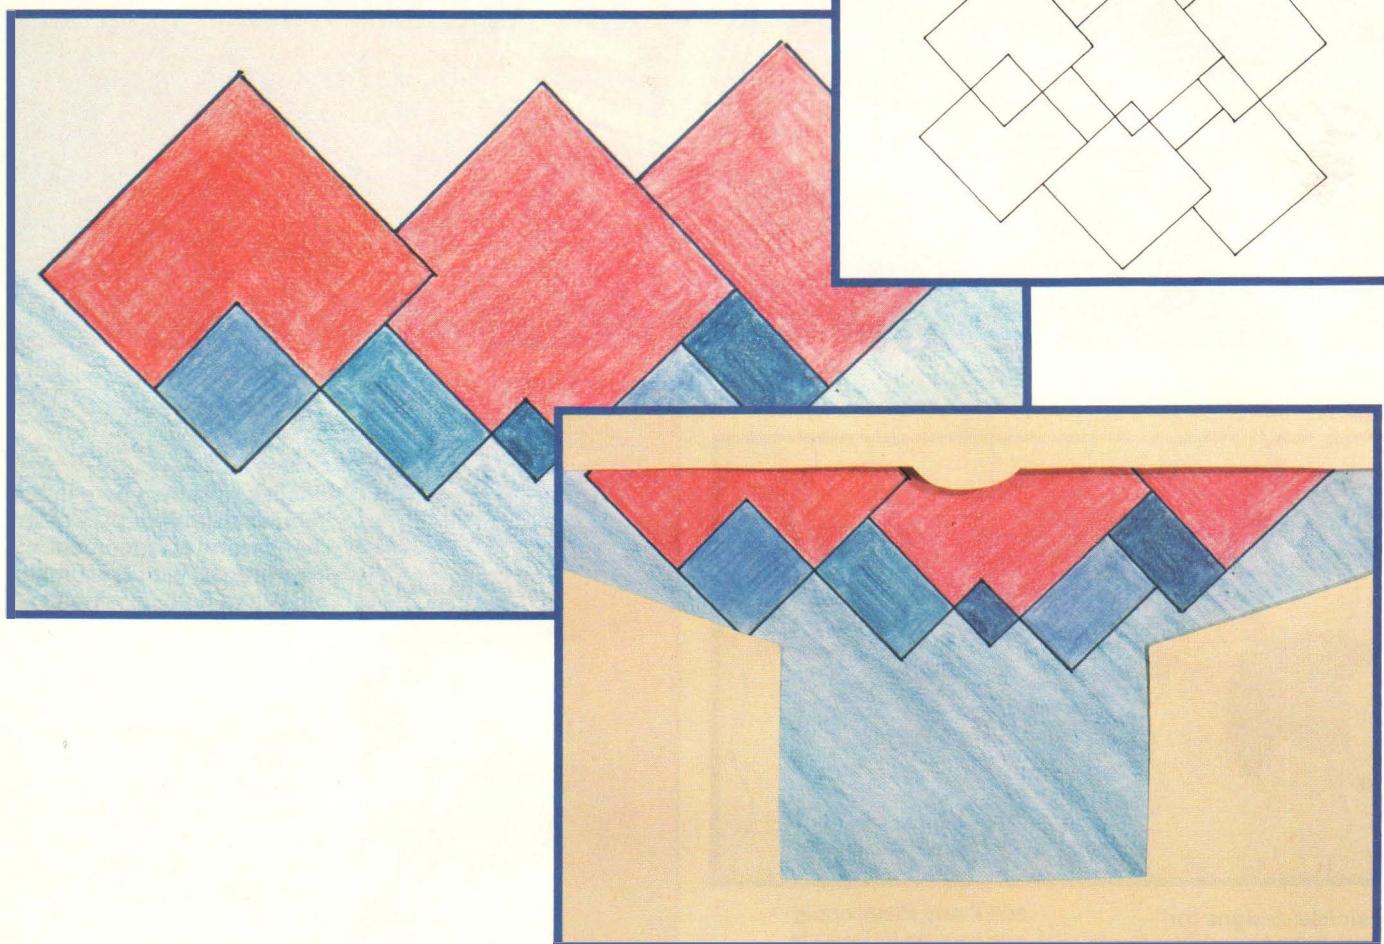

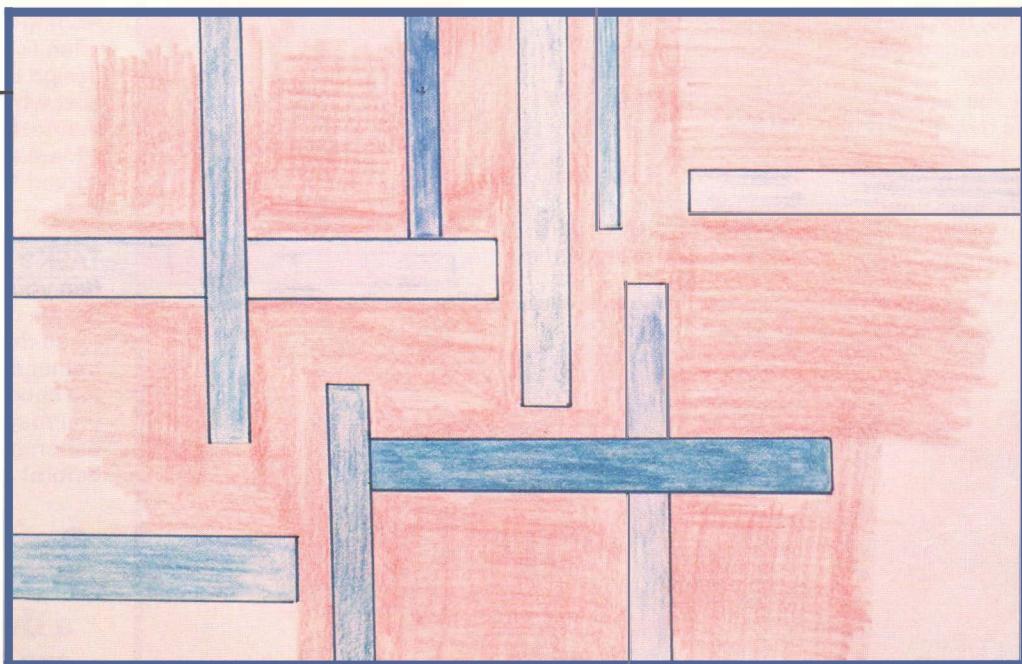

Can you guess where this design comes from? It was taken from a rubbing of a trainer sole. Take a look at the shoes in your house and you may be surprised at the patterns you have missed before!

Task 3

Once you have found a design you are happy with, the next step is to consider where and how to use it on garment pieces.

As it stands I already have a 'jazzy' Intarsia design but it doesn't end there — of course! I took a tracing of

Task 4**Task 5**

one line, simplifying it and then re-traced it several times, moving down as you can see.

Simply coloured in, I now have a very striking Intarsia design — from a shoe sole! Try it — find an interesting line, trace, move around and colour in — simple!

TASK 4

A square template, traced

round but sometimes overlapping and missing out sections of the lines. This can be built up into a large overall pattern. Then have fun colouring it in. This could be your design as it stands. Again use the cut-out to find the most pleasing area to knit. A way to simplify this idea is to trace off a section of the pattern leaving a large area as one

colour. This could be used as a horizontal or vertical design. Try the technique with other shapes — diamond, triangle.

TASK 5

Use strips of paper of varying widths to make a collage. You can choose how much background to leave showing through. Why not try using only a few

strips and adding other shapes to the 'open spaces' (for example, circles). You will find that different areas of this idea will give differing balances of check when you use the cut-out to focus on parts of it.

Jill.

JOIN THE CLUB

I am a keen Toyota machine knitter. I have the Toyota 950 knitting machine and I live in Grantham. I am a housewife with two grown-up sons and a 16 year old daughter who is at college. I would be interested in setting up a knitting club for Toyota owners. If anyone is interested would they get in touch with me. I would hold it in my own house to begin with until it got going.

DESPERATE TO LEARN

I am a disabled knitter with a Brother 891 machine with ribber and punchcard. I need help with various things i.e. buttonholes and how to use knitleader also lace carriage and linker. What I am in need of is someone who would be willing to come to my home and spend time with

me and give me confidence. I am desperate to learn. I am willing to pay for tuition but no one seems to know of anyone in our area who could help me. I am approximately six miles from Witney towards Swindon.

I suffer with MS, nothing anyone can catch, it is just that my co-ordination is a bit off, but I find using the machine helps. I used to do a great deal of hand knitting but now find holding the needles too much.

has the new Electronic Passap and this does not help when it comes to punchcards and deco etc. My hope is that someone can help me who knows how to do the basic things like work the deco, form computer, plain knitting and necks etc. I am willing to pay for the lessons but it would be

nice if the person is local and has the same machine as me or can come to my house and show me how to use mine. Please can someone help me learn my machine or it will not get the use I feel it should have.

Attaching a

BAND

Having spent two issues discussing a dividing work using a neckline as an example, it seems logical to take a little step sideways and deal with attaching a neckband. Certainly, this is something I am constantly asked about, particularly by knitters who came straight to Duos or 6000E without having a Japanese machine first. Even though I say 'neckband', this is just as relevant to attaching any sort of band such as a pocket tab, or button band on a cardigan.

There are many books and articles which tell you how to attach a band to a nice clean edge such as you get when you shape in the traditional manner but it is not so easy to find out how to attach a band when there is not an edge to make stitches from. In the last issue, I discussed some ways of marking out a neckline whilst knitting — what I call semi cut and sew — which then had to be stabilised with either a sewing machine or an overlocker. Whilst a sewn edge is perfectly acceptable from the practical side, it does require different treatment when it comes to applying a band. No matter how nicely you have stitched around, a cut and sewn edge is not necessarily a thing of

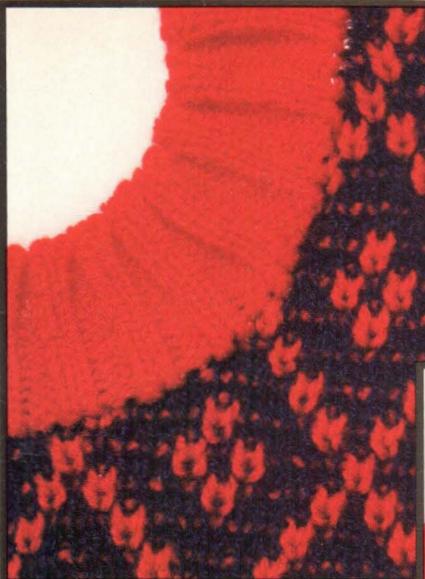

This month Irene
explains methods
of attaching bands
to produce a neat,
professional finish

beauty so it may need to be hidden. One method is to knit the band on to waste yarn and then backstitch through the held stitches to attach the band. This is a very satisfactory method, but can be so time consuming especially when you are trying to get it done in artificial light. For both methods I describe, the band is attached on the machine, but without the need to push the work up between the beds. This gives an even distribution of the band as the centre of the garment can be matched to the centre of the band and quarter points etc also matched. Of course, these are not the only methods nor are they suitable for every case. Bands can only be attached in the ways I describe when the edge can

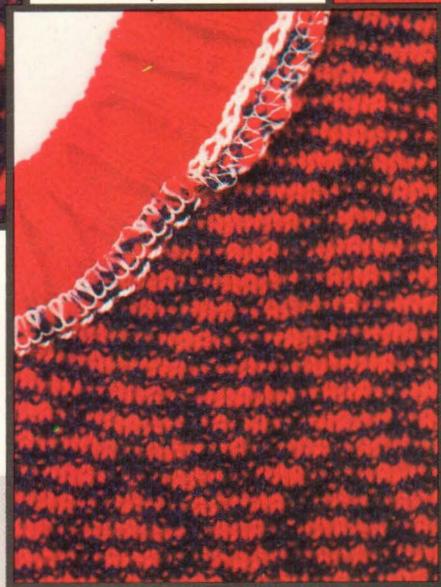

be opened out to form a straight line. In the case of a round neckline, this would mean leaving a shoulder seam open or applying the front and back neckbands separately before joining the shoulder seams. With a 'V' neck, because there can be a join at the centre front and another at the centre back (and both 'halves' are equal), it is possible to apply the neckband without leaving a shoulder open. Leaving personal preference aside, the method you decide upon depends on whether the wrong side of the join is going to be visible or not. On closed neckbands such as round necks, 'V' necks and polo necks, the seam will always be to the inside, against the body so the cut edge does not really need to be covered. Have the necessary garment

pieces ready. Hold the neckline against the needle scale to calculate how many stitches are necessary for the neckband and then knit the band. I have used ribbing but this works equally well with long stitch, Jacquard or other types of band. The only thing to remember is that the right side of the band must be facing you while you knit it. Transfer all the stitches to the back bed. If appropriate, you can knit two rows of stocking stitch to give a flatter join. Bring out a back bed pusher for every needle working and put these in the upper working position. They will not be used to knit but will act as stops for the needle butts to prevent the stitches becoming too big when knitting through. Drop the front bed and at this stage I usually take the precaution of draping it with a cloth to protect the garment. The right side is going to be lying over the front bed and it would be so easy for it to pick up an oil stain. If you are a beginner, find and mark the centre of the neckline as well as the quarter points. With the wrong side of the garment facing, put the eyelet end of the orange tool through the work below the stitching just to the left of centre and pull the first back bed needle on the left of centre through the

dexterity and concentration. You will not require assistance or helpful advice from small children, spouses or household pets so plan to experiment when you are not likely to be interrupted or under time pressure. It is not a good idea to try them for the first time on an actual garment. Practice on some of the pieces that you have hidden because the yarn is too good to throw away and you will eventually get around to unpicking (ha ha). Until next month,

This Chinese dragon jacket was inspired by ancient Chinese textiles, porcelain and painted wooden boxes. China seems to be one of those timeless countries where culture and especially art forms have changed very little since early stages of civilisation. Chinese art and decoration, in common with most eastern nations, shows an

almost instinctive harmonising of colours, patterns and line derived from the development of primitive ideas by successive generations of artists improving on each other's efforts. Some of the most beautiful Chinese decorations are those based on geometrical combinations. Chinese textiles show the ability to balance successfully both the fullest tones of colour and the most delicate shades — the tone of the background of any fabric is always in harmony with the quality and quantity of ornament which it has to support.

The initial storyboard or inspiration shows elements derived from fretwork, small repetitive geometric patterns, and stylized flowers and leaves. The colours are also significant — deep rich reds, greens, blues and golds, faded and aged by the centuries.

I chose a simple modern style and added layering and tassels to complete the ancient eastern look.

Silver Reed Machines

This month we are going to work on some Aran style fabrics, starting with a straightforward textured pattern which is completely automatic, and then moving towards a more authentic Aran look involving some handwork. I have knitted my samples in 4 ply on a Silver Reed SK840, which is the standard gauge version of the Silver Reed electronic modular system. However, if you have the SK890, the chunky version or the SK860, the double knitting gauge, you will be able to come up with some really authentic looking, heavier weight Aran style fabrics. Fine gauge owners can, of course, work with the following instructions too, but the effect will obviously be much finer.

SWATCH 1

Let's start with a textured fabric which is completely automatic so will, of course, be much quicker to knit if you want to knit a sweater with the general impression of an Aran sweater.

Insert electronic design card 4, pattern 29, from the basic set. Pattern width indicator 0 left, 25 right.

Button 1 right (this is the reverse colour button). We use it in this case to make the black rectangles tuck and the blank rectangles knit plain.

Button 2 left.

Button 3 on (this is the double length button). We

to use this pattern to knit a whole garment, you should draw only the first 12 rows of the pattern we are using on to a blank design sheet, so you don't have to manually take the card back to the beginning each time. Point cams at the edge of the knitting.

Needle 1 cam at needle 6 left of centre 0. I have placed it here so that the centre of the diamond is in the centre of the knitting.

Cast on 35 stitches each side of centre 0 and knit a few rows. Inspection light off. Set carriage to knit tuck stitch.

* Knit 24 rows (each row of the pattern is knitting twice because we are using the elongation button).

Inspection light on.

Turn card back to row 1 of pattern.

Inspection light off *.

This is the section that we are doing manually for the swatch, but wouldn't have to do if we drew the first 12 rows of the pattern on to a blank design sheet.

Repeat from * to * throughout.

SWATCH 2

Now we are going to introduce a plain section into this fabric so that we can add mock cables later, for a more heavily textured and authentic Aran look. We are going to use two sets of point cams to introduce a plain section but, again, if you want to knit a whole garment, redraw the pattern

The first point cam the carriage passes tells the machine to start patterning, the second one to stop patterning, the third one to start patterning, the fourth one to stop patterning and so on.

are using it to make the tuck pattern more pronounced. Each stitch will now tuck for 4 rows instead of 2 rows. We are not going to knit the full length of the pattern, so the following instructions include taking the card back to the beginning after knitting a certain number of rows. However, if you want

omitting the zigzag section of it. In the meantime, it will be good practice for you to use two sets of point cams.

Two sets of point cams

Here is a brief explanation of the theory of using two sets of point cams. As you knit, the point cam nearest the carriage tells your machine

ARA

From textured patterns to a more authentic Aran look, Laraine explains the techniques

to start patterning. The next point cam the carriage passes tells your machine to stop patterning and to continue in plain knitting. This is why you place a point cam at each edge of the knitting for an all-over pattern or, for a single motif, place them where you want the pattern to knit.

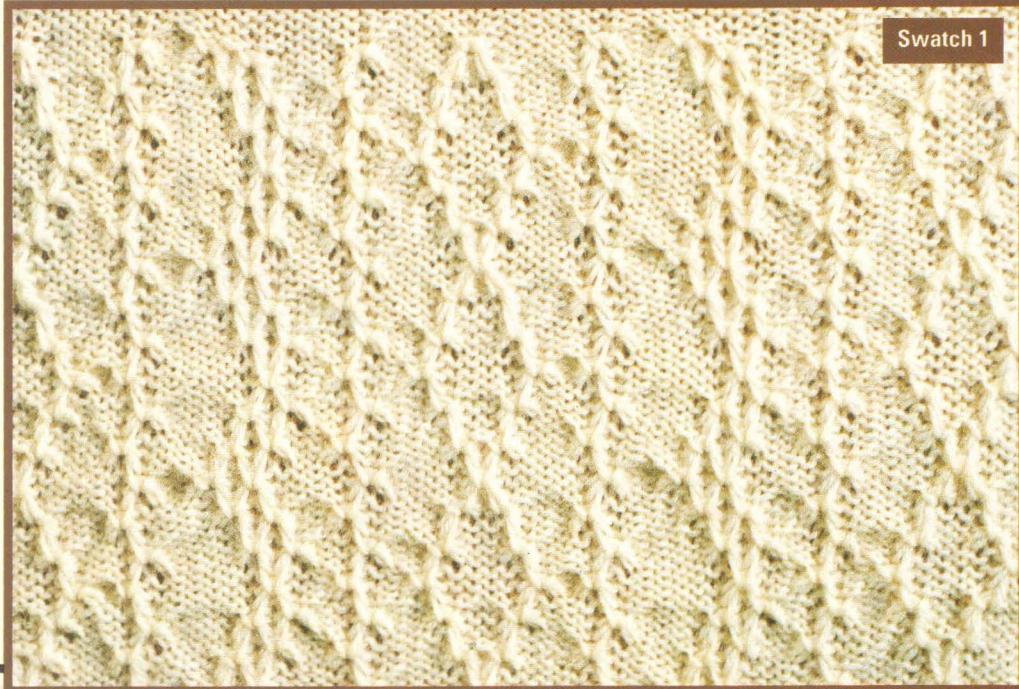

However, exactly the same thing happens when you use two or more sets of point cams. The first point cam the carriage passes tells the machine to start patterning, the second one to stop patterning, the third one to start patterning, the fourth one to stop patterning and so on. Therefore, we are going to use two sets of point cams to introduce some plain sections of knitting. You could also note

that each set of point cams needs its own Needle 1 cam. Needle 1 cams 20 left and right of centre 0. This will now place the diamonds to either side of centre 0 instead of in the centre as we had in Swatch 1.

Point cams (two sets) 21 left, 8 left, 8 right and 21 right of centre 0. This will give us a plain section in the middle, which we are going to embellish later with mock cables. You could make a cable in this section while you knit, if you prefer, but I rather like the chunkier effect you can get with strips of knitting sewn on afterwards. You could also introduce bobbles into this section if you like.

Use the same pattern as Swatch 1, sheet 4, pattern 9. Set the pattern width

N

Swatch 1

Style Fabrics

indicators to left 0, right 13. Buttons 1 right, 2 left, 3 on. Cast on 35 stitches each side of centre 0 and knit a few rows. Set carriage for tuck stitch.

Inspection light off.

* Knit 24 rows.

Inspection light on.

Turn card back to row 1 of pattern.

Inspection light off *.

As with Swatch 1, we are doing this section manually to save redrawing the pattern without the last 8 rows.

Repeat from * to * throughout.

Rouleaux for decoration

Rouleaux are usually made over four needles but, because I wanted something a little thicker, I knitted mine over five needles.

Remember to reduce your tension considerably when knitting a rouleau. For example, I knitted my swatch with the tension dial set to 8, whereas I knitted the rouleaux on tension 3. Knit several lengths of rouleau, lay them on to the pressed swatch to form mock cables and catch down

into position using sewing thread. A small stab stitch every 1.5cm or so will be sufficient. I also added strips of rouleau at either side of the patterning to give even more texture. Why don't you spend the next few weeks experimenting with combinations of different

tuck stitch patterns, plain sections and applied texture in the form of bobbles and rouleaux. You should be able to come up with some beautiful and intricate machine knit versions of the Aran style.

Combine borders with
sets of motifs

I have played around with the motif dial in the past, to demonstrate the possibilities in general. With this being the month of Valentine's Day, I thought I would get a little more specific and give you a few ideas for using it with the very appropriate heart motif!

Sample 2

PLACEMENT FOR A SMALL HEART

Sample 1 shows a small heart that has many possibilities. For the yoke idea shown in Sample 1, you will need to set your motif dial on 3 and work in Fair Isle for 24 rows. This will give you the first two rows

Sample 3

of hearts. Now reset the motif dial to 234 but return selected end needles to working position when selected outside three full heart motifs, that is, only needles between 18 left and

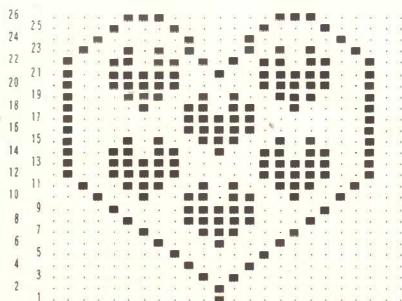

Carol Chambers concentrates on the heart motif this month, showing various pattern combinations

19 right should be allowed to be selected over the next 12 rows. When the third row of hearts is completed (if you started Fair Isle with RC at 000, it will now read 36). Continue in this manner — so the setting will remain on 234 but allow four hearts to be selected next time. After they have been completed, to continue the 'V' using this card, you will need to turn the card up and lock on row 25 (actually you need seven rows above this, so that the arrangement shown on 25 is actually 'in' the machine. Set carriage to select without

knitting, release the card and this time allow five complete hearts to select. After they have been completed, you will not need to manually return any more needles for the next set, as there will be six complete hearts on this dial setting.

VARIATIONS ON THE THEME

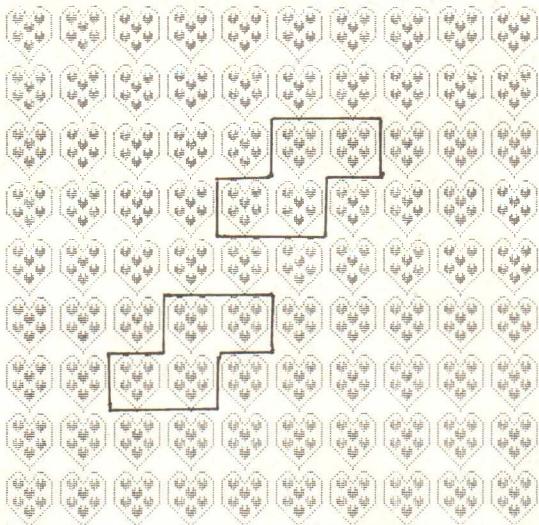

You can continue in this manner for the length and width of yoke effect you require. When you reach the neck shaping you can limit the effect of the motif dial to one shoulder at a time as

A Valentine Theme with the Motif Dial

Diagram 1 illustrates. Further details like working narrow or deep borders of matching pattern after welts or on sleeves all link the garment and its theme together. If you wanted the hearts to be slightly less 'corny', then use a variety of really bright

DIAGRAM 2

Work out interesting single motif placements by envisaging the repeats. Boxes show one possibility.

colours for them, changing the contrast colour on each new set of hearts on the yoke.

Note that Diagram 1 differs slightly from the sample — it shows a variation you would obtain by using the dial at 3 for first 12 rows, then dial 234 for next 12 rows then working right

across — normal all-over setting. This gives a difference of two additional hearts each time the motif dial is changed and by row 36 you will be working them as an all-over pattern. To convert the punchcard for an all-over pattern, punch only the repeats shown from row 25 to row 48 — repeating these 24 rows for the length of the card.

out or group adjacent motifs together — another possibility is shown in Diagram 2.

INFORMAL ARRANGEMENTS

Sample 3 (on page 84) illustrates the vertical look of our third heart design. The 'broken' heart can be used alone, or arranged diagonally across a garment as illustrated in Diagram 3 (page 84).

The Diagram shows the motif dial was set in turn at 1 (for two repeats): 2 (one repeat): 3 (worked as 1): 4 (worked as 2) and 5 (worked as 1). Take into account the size of garment and yarn thickness if you want to fit in as many motifs as this. If you are working on larger sizes, or garments with lots of ease, then this is viable. For smaller garments, you might want to use a finer yarn perhaps 3 ply instead of 4 ply — so that you need 'more' stitches and can fit all the motifs in.

Do not forget what you could add to your motifs to make them more informal in layout if that's your preference. A little Swiss darning of the arrow in the last sample using black or different colours, would add another emphasis to its appearance.

I expect we will return many times to the motif dial as, both in general and when assessed for specific themes, it's certainly very handy!

I went to Perth in Western Australia at the invitation of Peggy Buckingham for the Australian Forum for Textile Arts. Peggy is a small lady of infinite patience, energy and humour, attributes most necessary in running such an event. All the delegates affectionately nicknamed her the WARDEN because she could hardly ever be seen without a huge key ring in her hands. The Forum started on October 7th and ran through to October 14th and covered textile crafts as diverse and unusual as Bush Jewellery and Cabbage Tree Hats, to Hand Spinning and Knitting.

The programme consisted of two three-day hands-on workshops either side of the weekend. The weekend was set aside for short workshops, demonstrations and a craft market. Over the

eight-day period there were 22 different tutors and classes for people to choose from. Every lunchtime and evening there were events or talks on different textile crafts. This meant that everyone, if they wished, could learn a great deal about other crafts and their practitioners.

The venue was at a place called Noalimba outside Perth and near to Freemantle, of the America Cup fame. I was told to take bathing togs, as the weather would be good and there would be an opportunity to swim in the Indian Ocean.

When I arrived in Perth it was very cold and for the first 72 hours the temperature never rose much above two degrees! At the residence in Noalimba (nicknamed Stalingrad), the name arose from the cold and the building having a forbidding appearance — blankets became things to kill for!

My input into the event was to conduct two three-day workshops in Design Across the Crafts and to give the Saturday evening public lecture. The classroom facilities were excellent, as is this length of residential

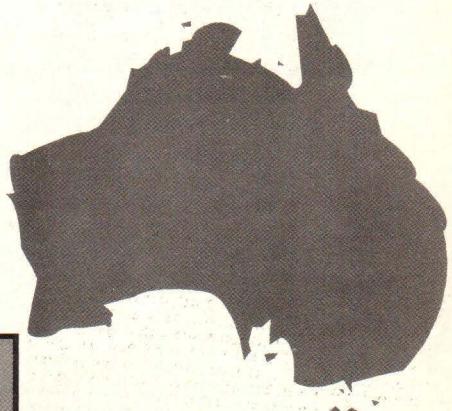

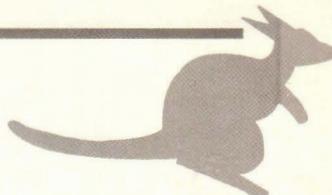

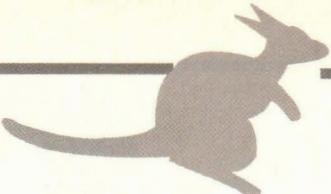

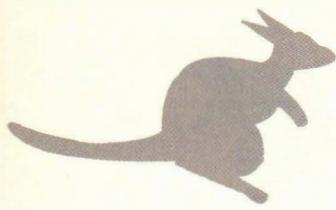

workshop, which enables the tutors to impart knowledge thoroughly and for the students to learn in ways not possible in the more usual short sessions most knitting conventions programme. I found teaching mixed groups of crafts people very different to classes made up exclusively of knitters. There was a continual interchange and cross-fertilisation of ideas going on between people from quite different craft disciplines.

My classes consisted of the manipulation of optical pattern, the use of positive/negative to produce designs. The demonstration of a range of basic design methods, followed by hands-on manipulation of some of these. The class also covered colour and proportion. Each day there was a two-hour lunch break, half of this time was given over to different tutors giving a talk on their work. These informal talks enabled

everyone to see work executed in craft areas other than their own. From the amount of information and knowledge passed on to students, I believe the 'Fibre 92' Forum was one of the best conventions I have been to. I met many interesting people and want to share with you a little about two of these, both designers having specialist talents which I think some of you will find as interesting as I did.

KRISTEN DIBBS is an embroiderer who has just published *The Fine Art of Embroidery* in Australia, as yet, not available in this country. She has a very ready wit and a fund of lovely quotations, for

example: 'dull women have immaculate homes'. Kristen ran the noisiest class on site, with cream cake teas in the afternoon! The work, however, she got out of her students reflected the extravagance of the cakes consumed! Whenever I was short of something, Kristen always seemed able to supply it. On visits to her class I noticed the work she and her students were doing and began to see the possibilities of some of the embroidery techniques being applied to knitting. Kristen herself has produced some very innovative fabrics using bio-degradable plastic rubbish bags, those environment friendly ones (the Australian authorities are far more aware of the

importance of this than ours are). She also uses the more common vanishing muslin. Yarn is embroidered on to either of these surfaces and then washed to dissolve the backing away, leaving the embroidery. Some of the finished fabrics look like

One idea inspired by Kristen was to produce a spidery piece of embroidery and then hang this on to a knitted surface.

recent and prestigious being the Wool Expo 1992 Wearable Wool Awards. In this competition Deborah cleared the board by being awarded a number of prizes plus the overall Supreme Award for the whole competition.

I had been told by a friend, Lyn Waring, that if I saw no other knitting while in Western Australia I should try and see Deborah Combes's work, but she warned this might be difficult, because Deborah is extremely reluctant to show her work and incredibly self-effacing. However, I did persuade her to show me some of her knitting which was beautiful and some of the most innovative fabrics I have ever seen produced on the Passap machine.

Deborah says her aim is to produce wearable art, making no more than three or four pieces of the same design. The fabrics which are cut and sewn are large, mainly abstract designs with a strong exuberant feel about them. This contrasts sharply with her use of colour which is often understated, chalky off tone colours giving the fabrics a very sophisticated look.

The fabric is of a knitted double cloth construction which allows the designer to cut large pieces of the top cloth away once the fabric is taken off the machine. By cutting into the cloth in this way the bottom fabric is revealed. The bottom fabric is often knitted in a very contrasting yarn to the top fabric, so that once exposed it adds visual excitement to the already interesting design patterns. The idea is by no means a new structure or method of fabric construction, I have seen it several times before, particularly in fabric created on the circular electronic knitting machines. What makes Deborah's work outstanding is the sophisticated combinations

spider's webs, but are quite stable provided care has been taken to overlap the embroidered lines and stitches. It did not take many visits to Kristen's workshop to realise that many of the techniques she used could, with a little imagination, be used in and on knitting to create innovative new surfaces. One idea inspired by Kristen was to produce a spidery piece of embroidery and then hang this on to a knitted surface. I hooked the spider's web of embroidery on to the needles in use, so knitting the embroidery into my knitted fabric. This produced the most exotic surface and could be achieved with Jacquard effects as well as plain knitted structures. All I want now is the latest idiot-proof electronic sewing machine!

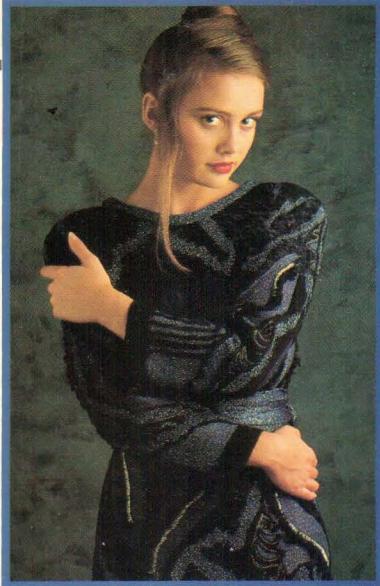

DEBORAH COMBES I met through one of my classes which she attended. Deborah studied textiles and fashion at the Bentley College of Textiles in Perth. Since finishing her studies in 1988 she has won many design awards. The most

Less than perfect

of patterns, textures and yarns she uses. The finished fabrics are excellent weights for garments, ranging from coating weights down to lightweight dress fabric (see illustrations). All her garments are cut and sewn and at the moment she is trying to perfect styles and silhouettes that have a timeless quality. There were many craftspeople at the Forum practising many traditional crafts and producing fascinating artifacts, it was the cross-fertilisation between these designers/creators, which made the 'Fibre 92' Forum so exciting. I believe such exchange of ideas across the crafts creates new approaches to them and encourages the

crossing of new frontiers and inspires new developments. I want to leave you this month with one last quote, picked up down under, which I believe is very true, 'She who never made a mistake never made anything'.

KNITTING YARNS

At Many A Mickle, you can find a wide variety of quality yarns to suit all your knitting needs. In 1990, the company joined forces with Brier Hey Yarns to put together the best of both selections. In the same year, they also won a British Wool Marketing Board Quality Yarn Award for their machine knitting yarns.

Many A Mickle offers the best collection of quality yarns waxed on cone for machine knitting available anywhere. You will find everything from pure wools and mixed fibres to 100% cotton and luxury mohair, all in a wide range of colours.

You can purchase yarns both by mail order or direct from the Many A Mickle shop at Brier Hey, Mytholmroyd, Hebden Bridge, West Yorkshire HX7 5PF.

(Telephone: 0422 882200/884749)

First prizewinner will be able to spend up to £150 on yarns of their choice; with second and third prizewinners having £100 and £50 to spend, respectively.

FROM MANY A MICKLE

1st Prize:

£150 worth of yarn

2nd Prize:

£100 worth of yarn

3rd Prize:

£50 worth of yarn

HOW TO ENTER

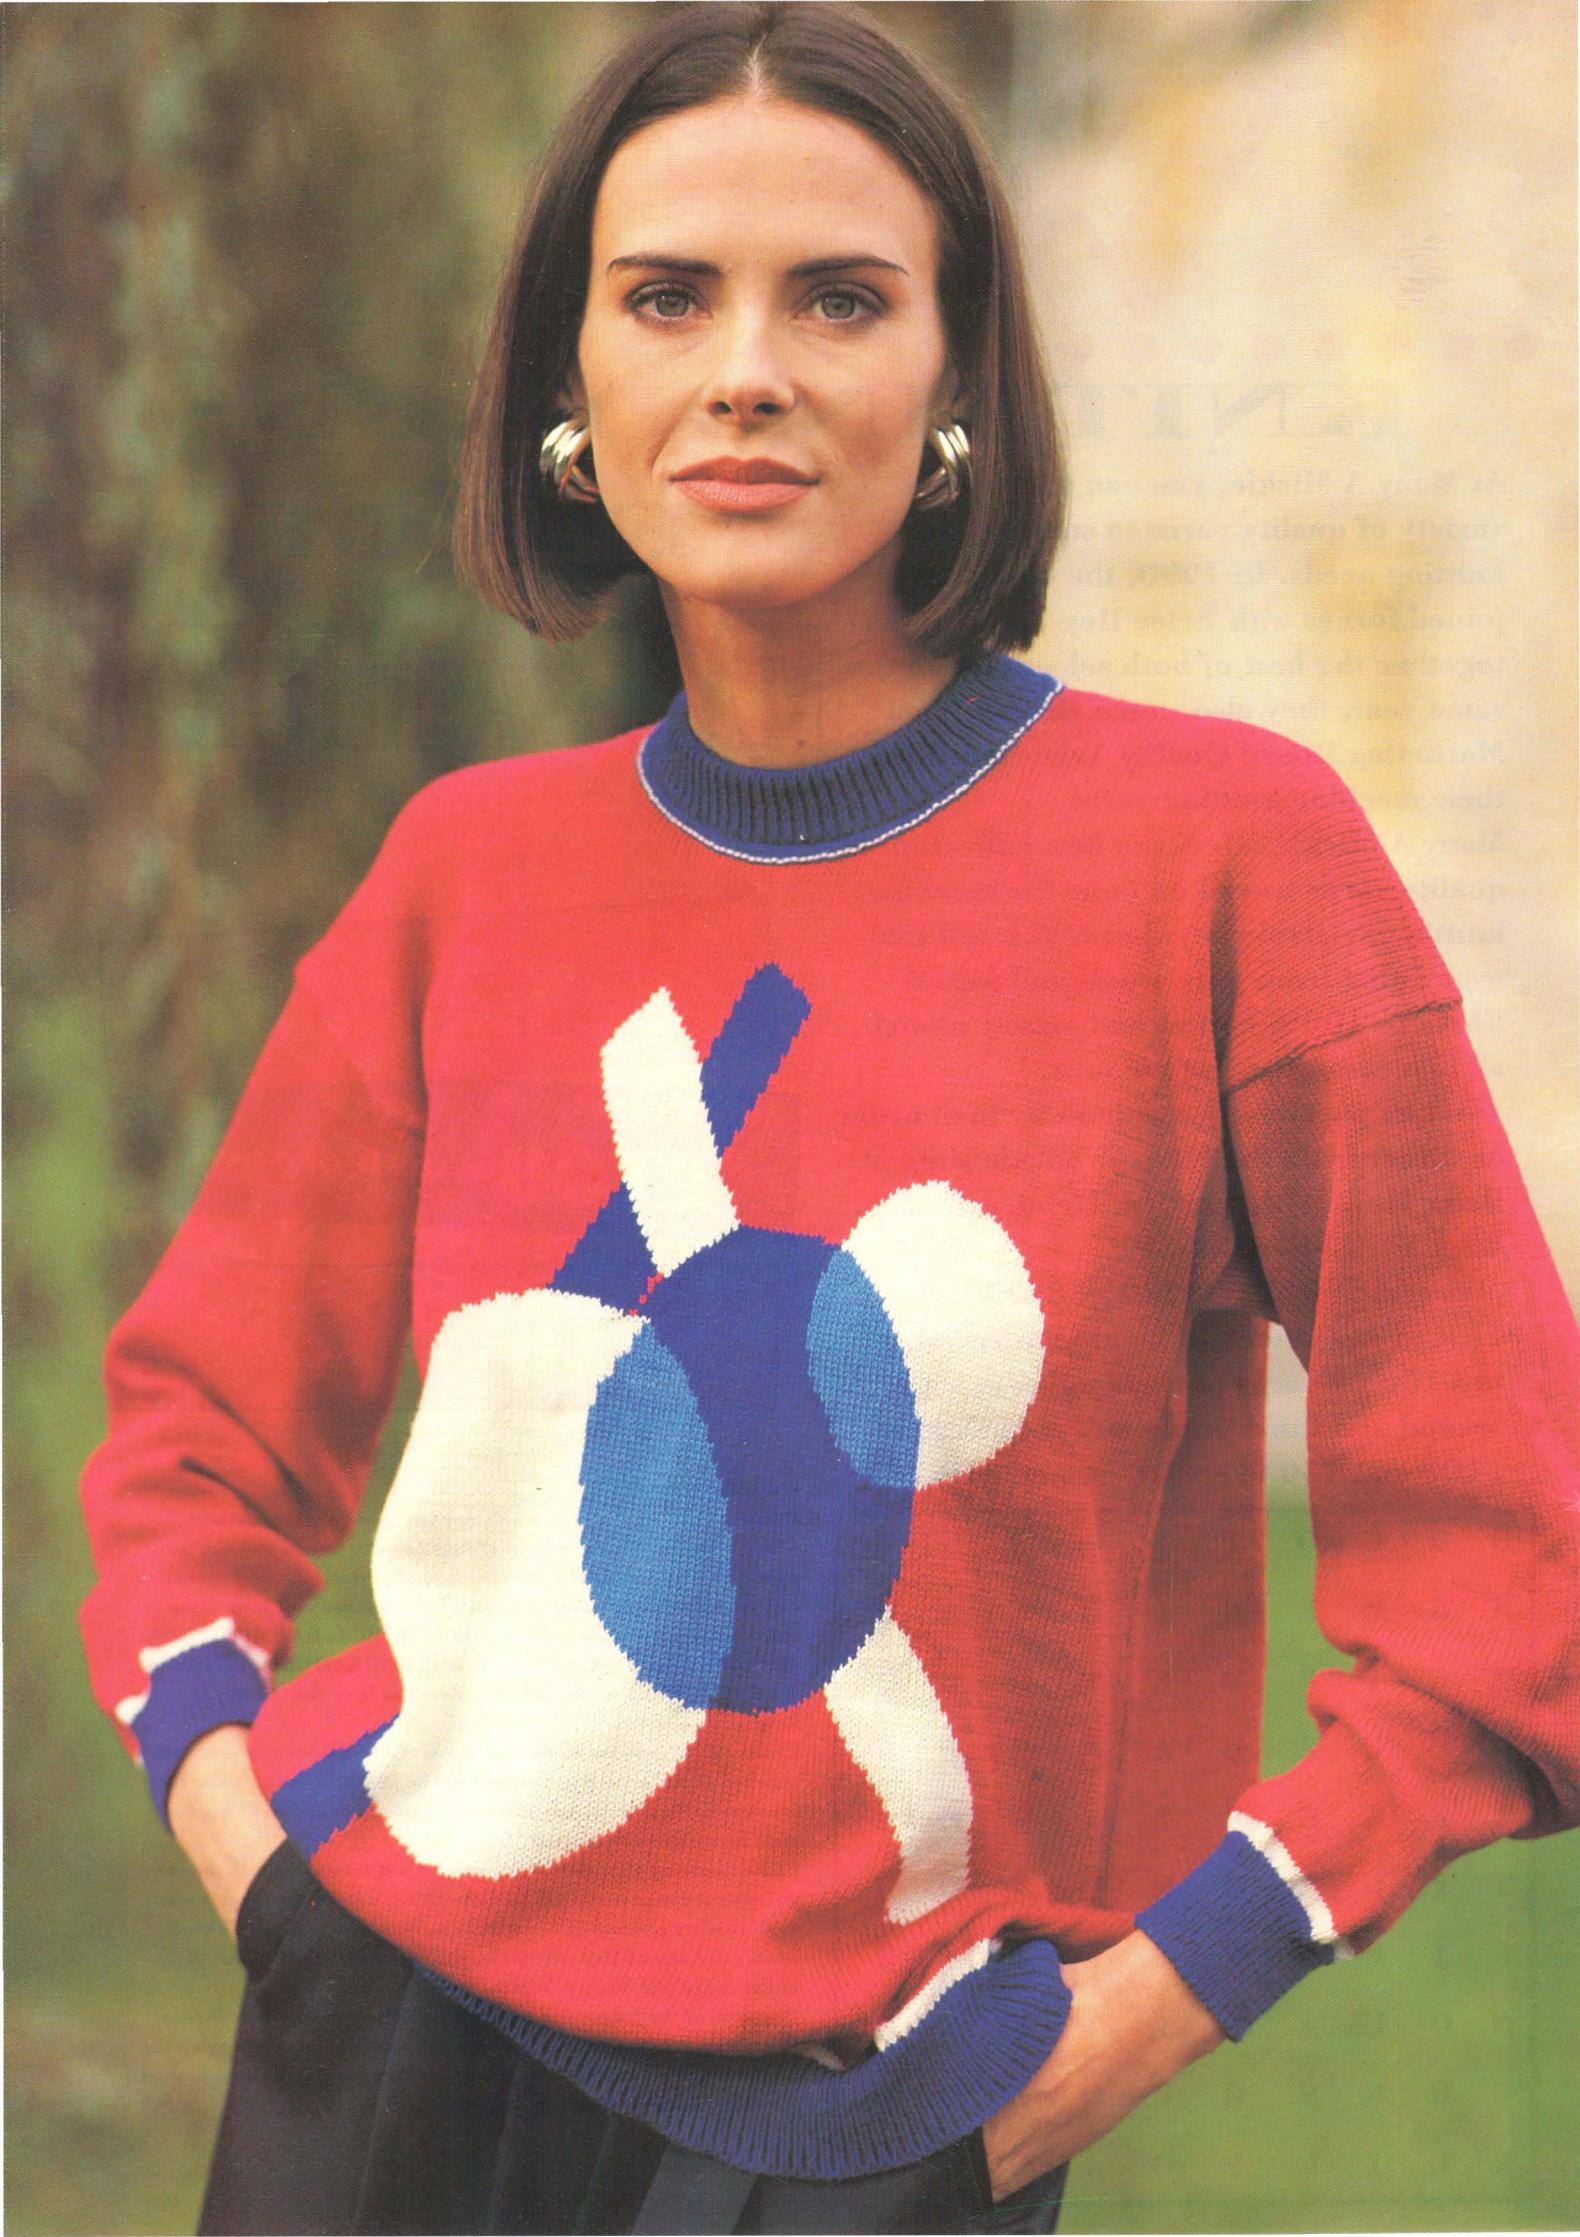

Hidden in the word search puzzle are ten words/phrases connected with our prizes. Each is a word of four or more letters and may be written forwards or backwards; horizontally, vertically or diagonally. List the ten words/phrases on a postcard, together with your name and address. Send your entry to: MANY A MICKLE COMPETITION, MACHINE KNITTING NEWS, PO BOX 9, STRATFORD-UPON-AVON, WARWICKSHIRE CV37 8RS, to arrive not later than Friday, February 26, 1993.

Prizes will be awarded to the senders of the first three correct entries checked after the closing date and will be allocated in the order they are drawn. No entrant may win more than one award and all prizes must be accepted as offered.

Entries arriving after the closing date or not complying with the rules and instructions exactly will be disqualified. The competition is open to all readers resident in Great Britain, Northern Ireland, Channel Islands and Isle of Man, except employees (and their families) of Litharne Ltd and Many A Mickle.

Decisions of the judges and the Editor of *Machine Knitting News* in all matters affecting the competition will be final. No correspondence can be entered into. Winners will be notified and the result published in a future issue of *Machine Knitting News*.

Who would think that the items in the photograph (see page 103) would be the inspiration for this Intarsia sweater designed on the Machine Knitter's Design Board — but they were all used as simple templates. Because it has a rigid surface, the Board makes the use of templates particularly easy. The four items in the photograph were moved around on the Design Board until the required effect was achieved and then the bases were drawn round to create the geometric design — no compasses, set squares, protractors required and the ruler was only used as a template — not to measure.

After the design had been squared off to create the chart it was time to choose the colours. Because the circles overlapped I decided to choose colours to give the effect of one colour being laid over the other to form a different shade — thus where the navy circle overlapped the cream a mid-blue was used.

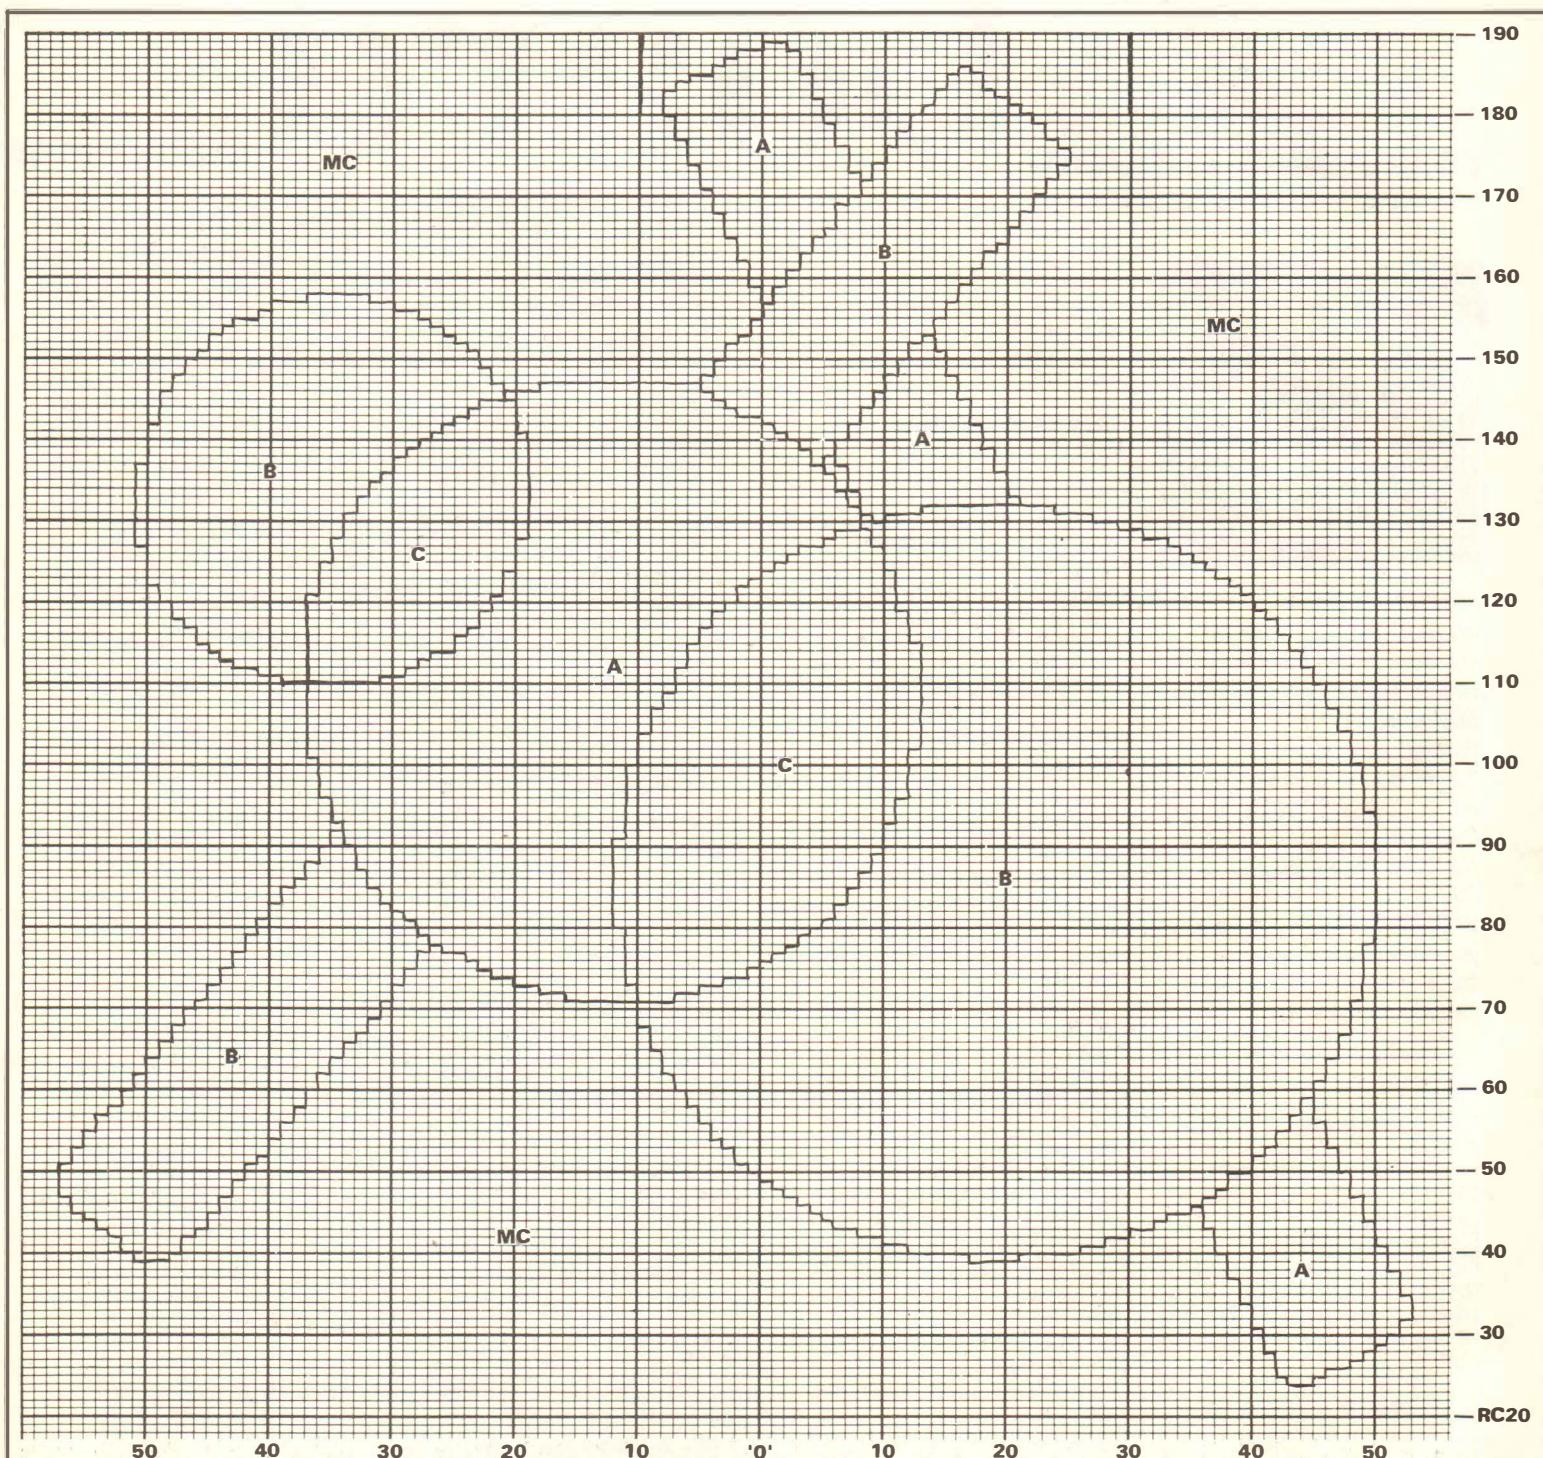

Many everyday items in the home can be used for templates, for example: biscuit cutters, various shaped tins and boxes, glasses, china. The list is endless and, of course, if a shape is used that doesn't give a pleasing effect, it can be cleaned off easily from the wipe clean surface of the Machine Knitter's Design Board.

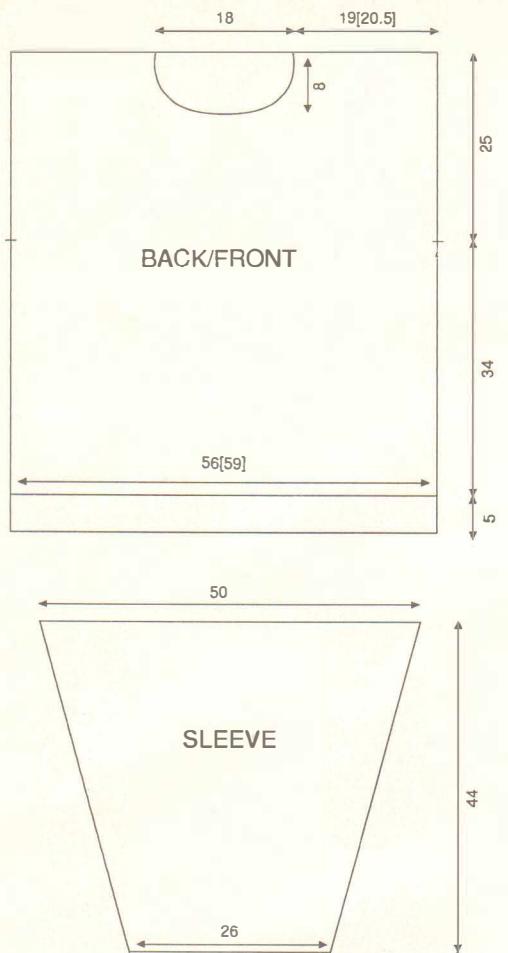

The Machine Knitter's Design Board is available from the Machine Knitter's Company,
PO Box 10, Cowbridge, South Glamorgan CF7 7YY.

HAPPY

VALENTINE

VALENTINE

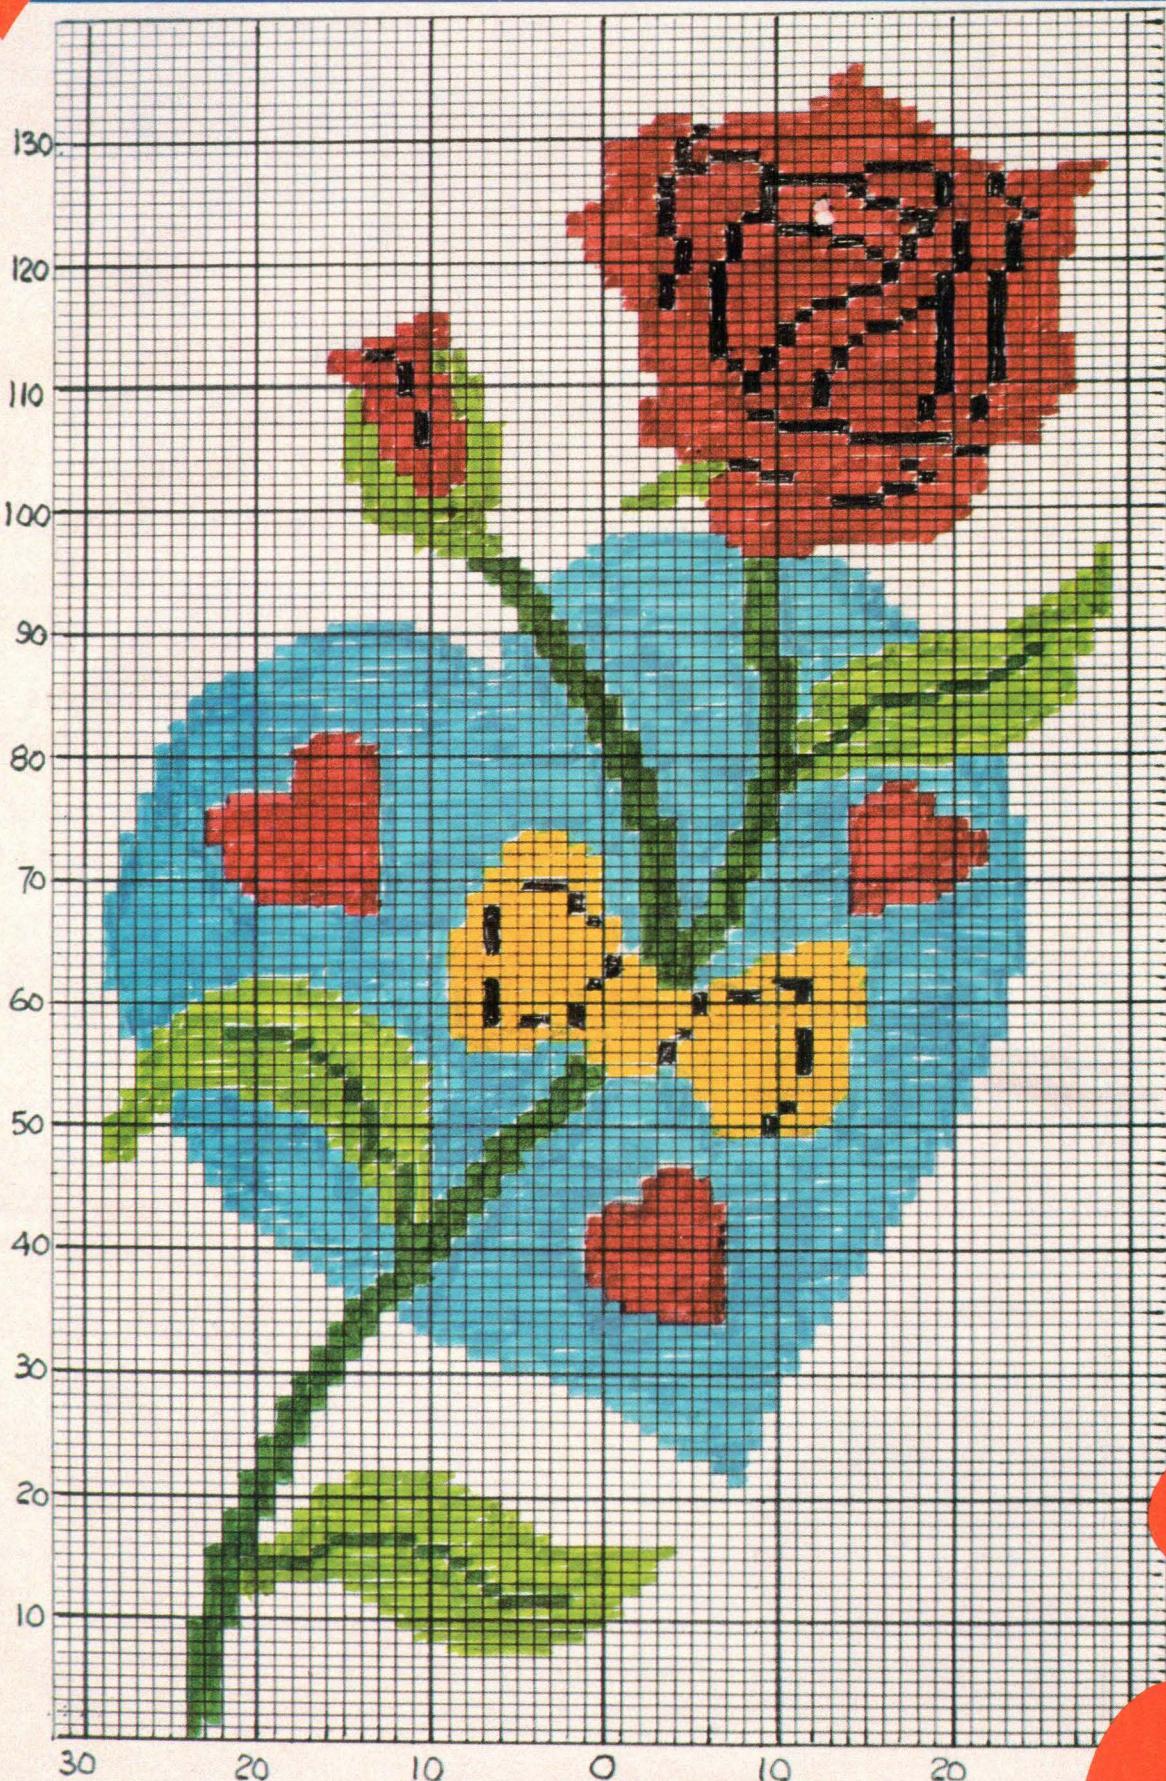

Hearts and flowers for Valentine's Day! This picture is like an old-fashioned Victorian valentine and as you can see from the swatch it makes a very effective Intarsia design.

The roses, which are superimposed on the heart, can be used independently, as a single motif, or several can be used on a sweater to give an overall design.

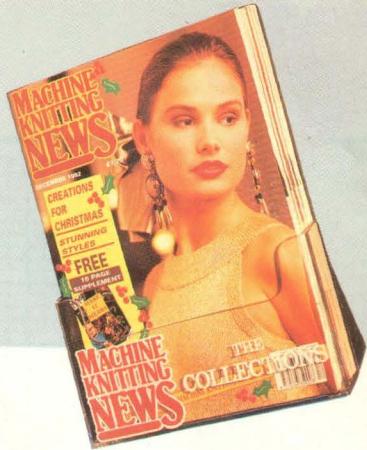

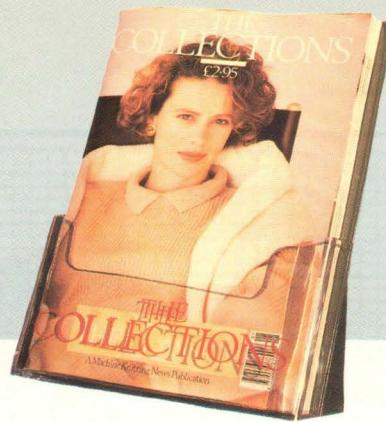

The rose can be used to decorate the fronts of a jacket or cardigan. As you will see from the swatch, I have used a neutral colour for the base colour, but the design would work equally well on a darker background, as long as you make sure that your contrast colours are going to show up well.

The yarn used was 4 ply wool and acrylic at a tension of 6 on the Intarsia carriage. The tension will vary with different machines, so you will need to do a test piece with the Intarsia carriage before you start the knitting. You do not need to use different colours, just do a small piece of knitting using one colour for your swatch, once you have done this it will not be necessary to do it each time you want to do Intarsia.

FOR MACHINES WITHOUT RIBBER MOCK RIB

Push the number of main bed Ns as given in the patt to WP. Return alt Ns to NWP for 1x1 mock rib. Return every 3rd N to NWP for 2x1 mock rib. Using WY, cast on and K a few rows, ending carriage at left. Using T10 and nylon cord, K1 row. Set RC at 000. Using MC and MT-3, K the number of rows given in patt (i.e. depth of rib). Using MT, K1 row (fold row). Using MT-3, K the same number of rows for depth of rib again. Return intermediate NWP Ns to WP. Pick up loops from first row worked in MC and hang on to empty Ns (plus adjacent N for 2x1 rib), evenly along row. Complete as given in patt. To remove WY when work is completed, pull nylon cord from one end of work, thus releasing waste knitting.

BRAMWELL YARNS TRAVEL THE WORLD

As well as being the U.K.'s leading supplier of coned yarn for machine knitting, Bramwell yarns are now being distributed to many countries around the world, enabling the discerning machine knitter to experience the superb quality, texture, colour consistency and constant weight and strength of their yarns. Bramwell's 100% Acrylic Fine 4 Ply alone has 62 shades, whilst Duomagic and Super Duomagic perfectly compliment Duomatic and all Double Bed machines. Bramwell also supply their own pattern books and various accessories, and are distributors of both Mary Weaver and Kathleen Kinder publications.

But you don't have to travel far, the following yarns are now available at your local stockist:

- 4 Ply Acrylic ● Hobby Knop ● Hobby Variations
- Rania ● Texas Chunky ● Baby Bramwell ● 2/30 Repeatable H.B. Acrylic ● Artistic ● Roseknit Superwash ● Bramwell Silky ● Metallic ● Instant Fair Isle ● Double Knit ● Opal ● Montana Cotton
- Ivette ● Duomagic ● Super Duomagic ● Zodiac
- Tweedknit ● Celebration ● Glitz ● Bramwool
- Chunky Mohair.
